

Paula Narvaez

Senior Product Designer · Consumer Products · Systems Thinking · Product Strategy

EXPERIENCE

Meta (Facebook) Senior Product Designer

New York City | July 2022 – July 2026

- Led the redesign of a Facebook surface serving ~3 billion users that had been stalled for four years by aligning cross-functional teams, simplifying 14+ controls into four, and improving Feed signal quality by ~20%.
- Defined the AI product strategy and experimentation roadmap for Facebook's redesigned menu, validated in a 10% production experiment and since shipped.
- Established the design governance model for trust, safety, and settings experiences by reviewing 74 proposals and 19 production experiments, maintaining >80% quality while preventing unreviewed changes to sensitive flows.
- Identified that teens blocked harmful contacts more often than they reported them, then designed a unified Block + Report experience to improve safety reporting across hundreds of millions of users.
- Built design-system components and interaction patterns used across 9,323 instances, raising quality from 10% to 95% while achieving a 1.06% detach rate, less than half the team average.
- Scaled design-system adoption through 50+ design critiques and 24+ support sessions, unblocking 90%+ of participating teams on accessibility and component decisions.
- Ranked top 5 of 210 Facebook designers for AI-native practice and independently shipped production code, including a fix for a six-year-old core web UI bug.

Google Nest UX Designer II

New York City | July 2021 – July 2022

- Built a modular lifecycle-email design system spanning 60+ marketing, service, payment, and transactional touch points for Nest Renew; the first send exceeded its click-to-open target by 2x.
- Established Nest's first WCAG AAA-rated experience and codified accessible patterns for broader reuse.

Dolby Laboratories UX Designer

San Francisco | Jan – July 2021

- Led the vision and interaction design for Dolby's first live-stream concert platform, creating a new experience without established patterns and delivering an immersive event that reached 80% viewership with 45 minutes of uninterrupted engagement.

Freelance UX Designer

New York | July 2020 – July 2021

- Launched Hula from 0 to 1 as founding designer, growing the consumer social app to 8,000 daily active users in New York City.
